Pairing instructions for Purekeys wireless keyboards 404XXX00 and 500XXX00

If you have received a new USB dongle for your keyboard, it must be paired before use.

Instructions:

1. **Check the batteries**
   Verify that the keyboard's batteries are installed correctly and working.

   - Press the **'key lock'** button. If the LED light flashes, the batteries are OK.

   - Press the **'key lock'** button again to turn the light off.

2. **Connect the USB dongle**:

   - Insert the new USB dongle into a free USB port on your computer.

   - Place the keyboard close to the PC to ensure a good connection.

3. **Pair the keyboard**:

   - Press and hold the **CONTROL + ALT + P** keys simultaneously for at least 6 seconds.

   - The three LED lights on the keyboard will flash for a few seconds.

   - Once the lights stop flashing, the keyboard is ready for use.

Troubleshooting

- If pairing fails, try inserting the USB dongle into a different USB port on your computer and repeat the pairing process.

- If you are unable to complete the pairing using these instructions, please consult the FAQ at purekeys.com or contact support.
