

USER MANUAL

Purekeys compact keyboard with VESA inserts

Model: PK-KBC-01001

Compatibility

The Purekeys compact keyboard is plug-and-play compatible with Windows PCs. No additional drivers are required.

After connecting the keyboard to a free USB port, the operating system may take a few minutes to install the necessary drivers automatically.

Cleaning Instructions

The silicone cover is designed for quick and thorough cleaning with hospital-grade disinfectants, including 70% alcohol.

- 1. Activate cleaning mode:**
 - Press the **'key lock'** button, the light indicator will turn on, indicating that the keyboard is in cleaning mode. The keyboard is now disabled to prevent unintended inputs.
- 2. Clean the keyboard:**
 - Use a disinfectant solutions to clean the surface.
- 3. Reactivate the keyboard:**
 - Press the **'key lock'** button again to exit cleaning mode. The light indicator will turn off, and the keyboard will be ready to use.

Adjustable Angle

For user comfort, the keyboard angle can be customized with the included rubber feet:

- Attach **4 x 5mm rubber feet** for a flat position.
- Attach **2 x 5mm feet at the front** and **2 x 15mm feet at the rear** for a 6° angle.

Compliance

Purekeys declares that this product complies with the essential requirements and other relevant provisions of the European Regulation 2004/108/EC.
